

From a single item to a shippable pallet Serialization Equipment

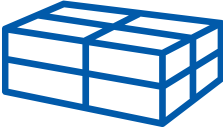

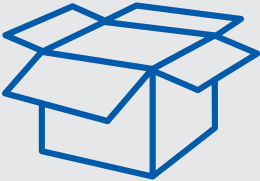

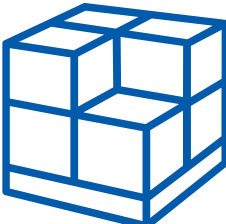

The Dec Serialization equipment solutions are designed to simplify packaging processes. Our Serialization equipment solutions are compatible with all high-tech production facilities and software processes known in the pharmaceutical packaging industry, and can be customized according to the unique requirements and specifications of every individual customer.

At Dec, we strive to develop innovative, customized solutions for packaging processes in the Life Science industries. We aim to guide our clients through each level of the serialization process, from a single item to shippable pallets.

From a single item to a shippable pallet Serialization Equipment

	Name	Type	Specifications
	I4L-ISU1	Low capacity; manual	Item serialization
	I4L-ISU2	Low capacity	One side print, verify, reject
	I4L-ISU3	High capacity	Two sides print, tamper evident
	I4L-ISU4	High capacity	Two sides print, tamper evident, top label/top print
	I4L-BSU	Manual	Bundle serialization
	I4L-CSU-M	Manual	Case serialization, hand scanner
	I4L-CSU2	Manual	Case serialization, pack by layer vision scan
	I4L-CSU2*	Manual	Case serialization, pack by layer vision scan, label, print & apply
	I4L-CSU4	Semi-automated	Case serialization, pack by layer
	I4L-CSU5	Semi-automated	Case serialization, pack by case
	I4L-PSU2	Manual	Pallet serialization
	I4L-PSU4	Fully automated	Pallet serialization
